01 - Who We Are

Lively is a health and wellness app used to find highly-rated health care providers, exercise and diet plans, and a variety of community support groups in a local area.

Our main goal is to allow our users to regain some semblance of control over their personal health care, in spite of the bureaucracy of the United States health care system.

02 - Our Language and Voice

Complicated jargon is a hindrance to our users. We employ clear, simple language and utilize humor and levity where it is appropriate. We want an uplifting voice that conveys warmth in our written copy. Think friendly, fun, and non-threatening. Navigating health care oftens feels threatening enough

In essence, our users should be left with a feeling that our name, "Lively," is indeed an appropriate name.

03 - Photography and Illustration

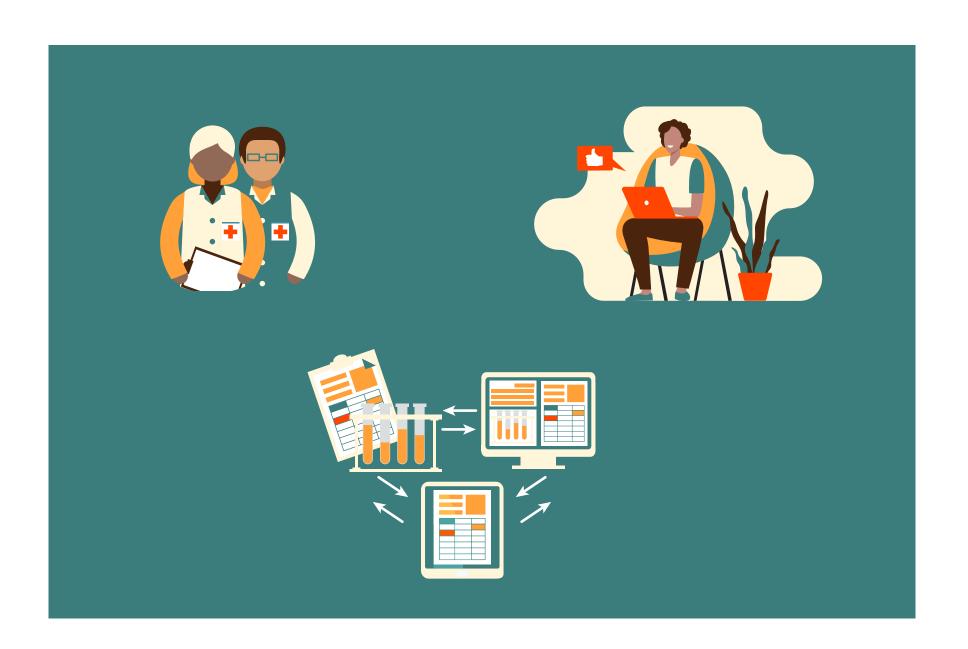

Our use of illustration and photography should echo the written copy and maintain a tone of warmth, friendliness, and fun.

Illustration must adhere to our Color Specifications (see next page) and maintain a flattened style with minimal depth.

Photography should depict humans as much as possible, with warm tones and softer lighting, and depict healthy practices and habits when appropriate and relevant.

We do NOT use black and white imagery.

When overlaying content over photography, add a 30% opacity fill of Dark Gray (see next page) set to a blend mode of Multiply.

05 - Typography

Interface Bold

Interface Regular *Interface italic*

Lively uses the typeface, Interface.

The Bold weight is used for all headings and navigation.

The Regular weight is for used for body text and chips.

The Italic style and weight is used for input field prompts and to place emphasis.

The goal is to keep all text clean and clear in it's visual styling, easily legible and accessible. Copy using the Regular weight should never be smaller than 15pt (including the Italic styling)

DESKTOP

Prompts: Interface Italic | 15pt | 0em

06 - Logo Usage

SIZE SPECIFICATIONS

Minimum Height: 40px

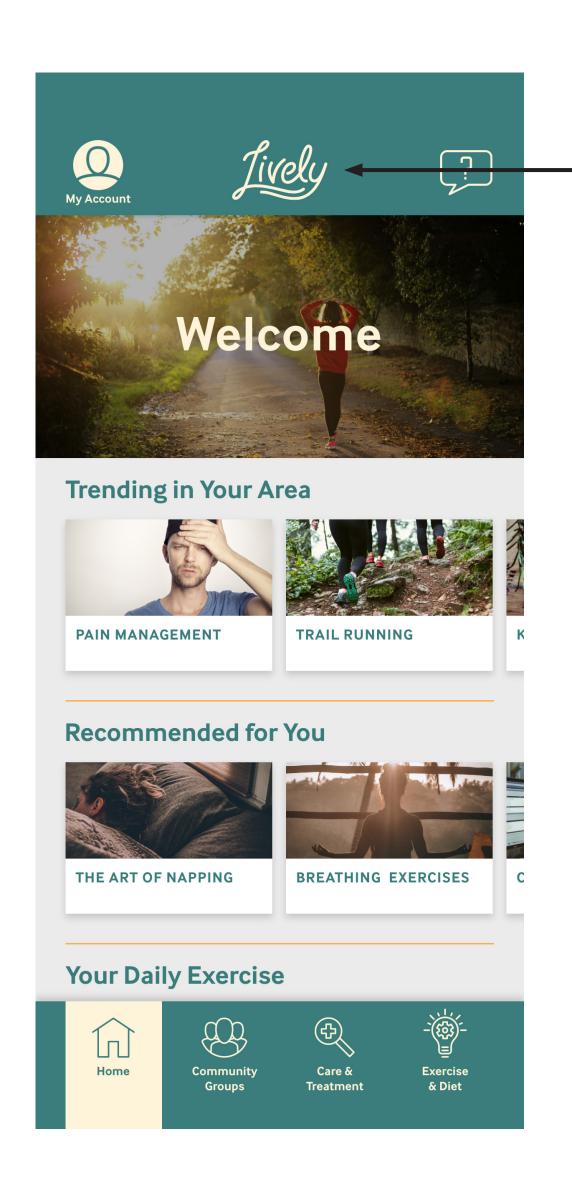

Minimum Width: Scaled to minimum height

Minimum clearspace: 12 px on all sides

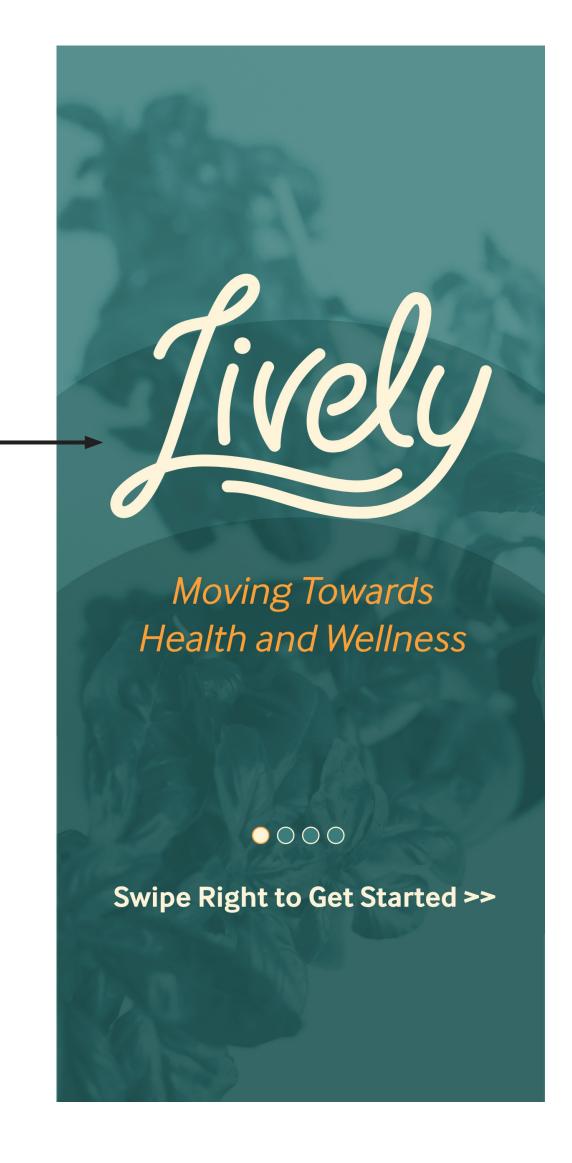

WEB INTERFACE APPLICATION

Main Beige placed on top of Main Green or dark photo background

Plenty of clear space around logo. Beige on green for good contrast

Beige on dark photo background with green overlay

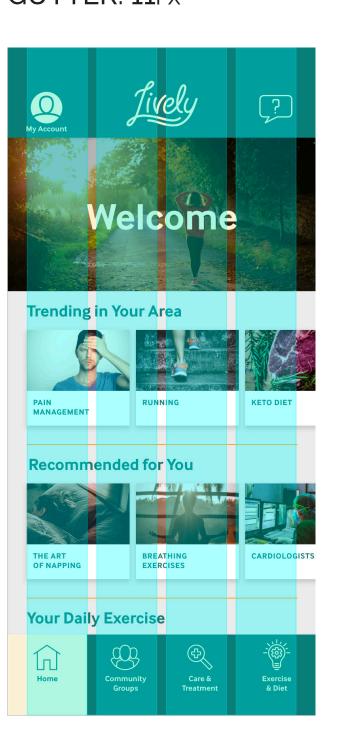

07 - Grid Specifications

Lively uses a 4 column grid for mobile interfaces and a 12 column grid for desktop/laptop interfaces. To make the interfaces more readable and accessible, utilize generous margins.

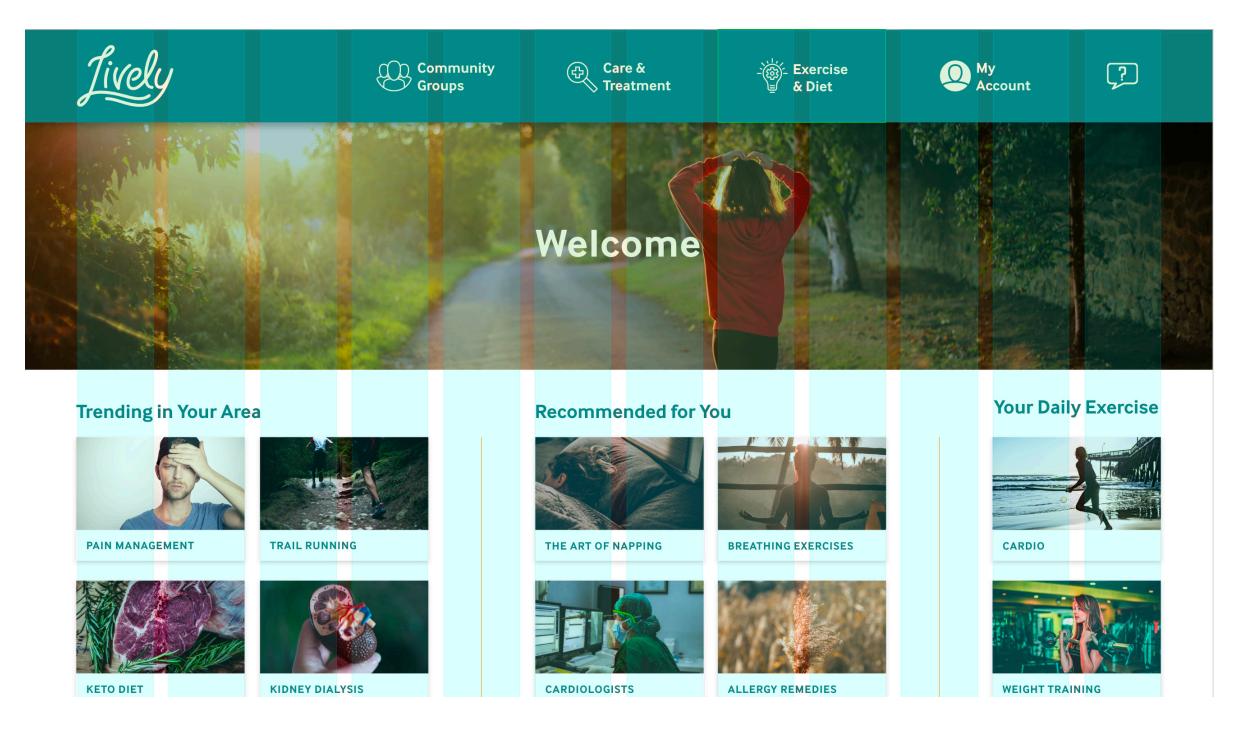

MOBILE

COLUMNS: 77PX
MARGINS: 24PX
GUTTER: 11PX

DESKTOP

COLUMNS: 124PX
MARGINS: 84PX
GUTTER: 24PX

User Interface Elements

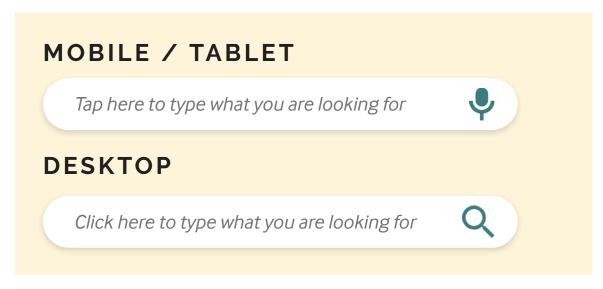

BUTTON STYLES

PRIMARY SECONDARY INACTIVE

The height of the buttons should not change, though the width can adapt to work with the button text and fit the layout. Button text is in all caps.

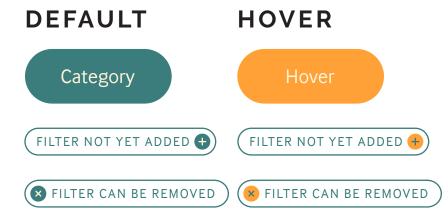

HOVER

SEARCH BARS

Mobile / Tablet search utilizes voice-to-text so the iconography should reflect that. Desktop search should have a traditional magnifying glass icon.

CHIP STYLES

Category chips navigate to search result pages that all fall under the chosen category.

Filter chips refine the results of a userdefined search or a category search.

DIALOG BOX

Informational text here **ACTION 1 ACTION 2**

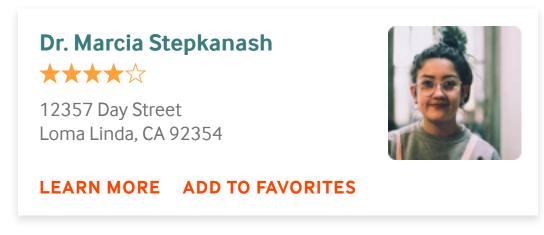

Dialog boxes have a darker shadow than cards and should also have a scrim behind them of the Dark Gray at 30% opacity and the blend mode set to Multiply.

Accessibility

Visual contrast is a high priority.

All interfaces must adhere to a grid layout, with text left-justified and a ragged right edge to improve readability for our users with various visual challenges such as dyslexia.

White space should used generously.

Mobile interfaces must utilize voice-to-text functionality wherever appropriate.

Remember that interfaces need to benefit our users and reduce the stress of navigating health care so that they can improve their overall wellness.
